Notes:

On site 15:45. 20 mph wind from the SE, 66 degrees, mostly cloudy. Nearest water is a large wetland that lies on the east side of the facility well pad. Fire was at the treater flare. It burned an area 10 meters by 15 meters in the adjacent wheat stubble field. The fire appears to have self extinguished. Recommend revisiting in mid summer to ensure that no long-term impacts have occurred to the wheat field. Off site 16:10.
